Walk-in

Having a lot of space doesn't mean there's a place for everything; having an ORG walk-in system does. A professional design assures that everything you could possibly need to store is kept neat and fresh, ready for its next use.

1. Details like $\frac{3}{4}$ -inch furniture-grade particle board with thermal-fused laminate, base and crown molding and a solid-surface-topped island add function and class.
2. Cedar shelves and glass doors keep sweaters in view and in one piece.
3. The velvet-lined jewelry tray keeps your precious items separated and organized. Use the tray in a drawer with an optional lock, and the items aren't accessible to children looking for dress-up accessories.
4. A variety of finishes and styles, like the wood grain raised panel drawer fronts shown here, are available.

Ask your dealer about the wide variety of accessories available for use in our walk-in, including:

- Tie racks
- Belt racks
- Baskets
