Reach-in

As children grow, so do their storage needs. ORG your reach-in closet with as many options as there are seasons in life. A three-tiered rod section can become two-tiered; shelves are adjustable, and drawers can be added. Our patented wall-mounted system simplifies cleaning. It's easy to adjust yet extremely durable—each eight-foot section holds over 1,200 pounds!

1. The reach-in closet is available in many colors and finishes, including wood grains.
2. Choose a drawer front profile to customize your closet in a way that suits your tastes.
3. Baskets in various sizes are a great alternative to drawers when you want to be able to see the contents. Both the baskets and drawers are available with full-extension ball bearing glides.
4. A removable canvas basket liner keeps small toys contained or helps transport dirty clothes to the laundry room.

Many options, including a wide variety of door and rod choices, let you design the perfectly organized closet, whether it's for you or the kids.

Ask your dealer about the many other accessories available for use in the reach-in, including:

- Laundry baskets
- Valet rods
- Belt racks
