Home Office

How well can an office fit into your home? See for yourself. We can create the perfect system for any space, from a spare corner to a spare room. And by paying attention to details like wood grain finishes, stylish hardware, and molded fronts and base panels, we can help even the busiest office blend seamlessly into your home.

1. Our custom designs make the most of your space, however large or small.
2. Corner shelves take full advantage of normally unused space.
3. Our exclusive wire management system tucks cables away into runways beneath the desktop.
4. Files nest neatly out of sight inside drawers designed to hold letter, legal, or even both kinds of files at once.
5. Behind each warm wood grain front is a solidly built drawer tough enough to house your heaviest files.
