Office/Wall bed

Whether you're making the most of a studio apartment, creating a home office or looking for a place to put the guests, ORG's wall bed and home office systems give you options you might not even have imagined.

1. The proper filing drawers—whether standard or lateral, legal or letter sized—keep your important paperwork in order. Adjustable shelves, left open or concealed behind doors, let you display or hide your treasures.
2. Creating a home office setup in a wood grain, like the cherry finish shown here, takes the aesthetic sophistication up a notch. Halogen task lighting and a variety of door profiles, with or without glass inserts, are also available.
3. The wall bed, when hidden away, takes up only 16 inches of floor space against the wall. The bed frame, available in single, double and queen sizes, accommodates standard mattresses and acts as its own box spring. So, whether you need an extra "room" for guests or work—ORG's wall bed and office system is a great solution.

We'll design a system to fit your needs!
